INFORMATION TECHNOLOGY SCHEDULE PRICELIST
GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY
EQUIPMENT, SOFTWARE AND SERVICES**

Special Item No. 132-8 Purchase of Equipment
Special Item No. 132-51 Information Technology Professional Services

SIN 132-8 PURCHASE OF EQUIPMENT

FSC Class 7010 System Configuration
FSC Class 7025 Input/Output And Storage Devices
FSC Class 7035 ADP Support Equipment
FSC Class 7042 Mini And Micro Computer Control Devices
FSC Class 5810 Communications Security Equipment And Components

SIN 132-51 - INFORMATION TECHNOLOGY (IT) PROFESSIONAL SERVICES

FPDS Code D301 IT Facility Operation and Maintenance
FPDS Code D302 IT Systems Development Services
FPDS Code D306 IT Systems Analysis Services
FPDS Code D307 Automated Information Systems Design and Integration Services
FPDS Code D308 Programming Services Millennium Conversion Services (Y2K)
FPDS Code D310 IT Backup and Security Services
FPDS Code D311 IT Data Conversion Services
FPDS Code D313 Computer Aided Design/Computer Aided Manufacturing (CAD/CAM) Services
FPDS Code D316 IT Network Management Services
FPDS Code D399 Other Information Technology Services, Not Elsewhere Classified

- Note 1:** All non-professional labor categories must be incidental to and used solely to support hardware, software and/or professional services, and cannot be purchased separately.
- Note 2:** Offerors and Agencies are advised that the Group 70 – Information Technology Schedule is not to be used as a means to procure services which properly fall under the Brooks Act. These services include, but are not limited to, architectural, engineering, mapping, cartographic production, remote sensing, geographic information systems, and related services. FAR 36.6 distinguishes between mapping services of an A/E nature and mapping services which are not connected nor incidental to the traditionally accepted A/E Services.
- Note 3:** This solicitation is not intended to solicit for the reselling of IT Professional Services, except for the provision of implementation, maintenance, integration, or training services in direct support of a product. Under such circumstances the services must be performance by the publisher or manufacturer or one of their authorized agents.

INFORMATION FOR ORDERING ACTIVITIES
--

SPECIAL NOTICE TO AGENCIES:

Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!TM on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!TM and the Federal Supply Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

1. GEOGRAPHIC SCOPE OF CONTRACT:

Domestic delivery is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. Domestic delivery also includes a port or consolidation point, within the aforementioned areas, for orders received from overseas activities.

Overseas delivery is delivery to points outside of the 48 contiguous states, Washington, DC, Alaska, Hawaii, Puerto Rico, and U.S. Territories.

Offerors are requested to check one of the following boxes:

- The Geographic Scope of Contract will be domestic and overseas delivery.
- The Geographic Scope of Contract will be overseas delivery only.
- The Geographic Scope of Contract will be domestic delivery only.

2. CONTRACTOR'S ORDERING ADDRESS:

DELTA SECURITY TECHNOLOGIES, INC.
205 SOUTH WHITING STREET
SUITE 205
ALEXANDRIA, VA 22304

Contractor's Service Area: All Government locations within the scope of the contract.

Contractor's Payment Address:
DELTA SECURITY TECHNOLOGIES, INC.
205 SOUTH WHITING STREET
SUITE 205
ALEXANDRIA, VA 22304

Contractors are required to accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery orders. Government purchase cards **will** be acceptable for payment above the micro-purchase threshold. In addition, bank account information for wire transfer payments will be shown on the invoice.

The following telephone number (s) can be used by ordering agencies to obtain technical and/or ordering assistance: 703-751-9515
FAX: 703-751-6123

3. LIABILITY FOR INJURY OR DAMAGE

The Contractor shall not be liable for any injury to Government personnel or damage to Government property arising from the use of equipment maintained by the Contractor, unless such injury or damage is due to the fault or negligence of the Contractor.

4. STATISTICAL DATA FOR GOVERNMENT ORDERING OFFICE COMPLETION OF STANDARD FORM 279

Block 9: G. Order/Modification under Federal Schedule
Block 16: Data Universal Numbering System (DUNS): 12-1769074
Block 30: Type of Contractor: B. Other Small Business
Block 31: Woman-Owned Small Business: Yes
Block 36: Contractor's Taxpayer Identification Number (TIN): 52-2055282

4a. CAGE CODE: 1R9Y8

4b. Contractor has registered with the Central Contractor Registration Database.

5. FOB DESTINATION

6. DELIVERY SCHEDULE

a. **Time of Delivery:** The contractor shall deliver to destination within the number of calendar days after receipt of order (ARO), as set forth below.

Items or Groups of Items (SIN or Nomenclature)	Delivery Time (Days ARO)
132-51	30 Days or as negotiated on the task order level.
132-8	45 Days or as negotiated on the task order level

b. **Urgent Requirements:** When the Federal Supply Schedule contract delivery period

does not meet the bona fide urgent delivery requirements of an ordering activity, ordering activities are encouraged, if time permits, to contact the contractor for the purpose of obtaining accelerated delivery. The contractor shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies shall be confirmed by the contractor in writing.) If the contractor offers an accelerated delivery time acceptable to the ordering activity, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

7. **DISCOUNTS:** Prices shown are NET Prices; Basic Discounts have been deducted.
- a. Prompt Payment: None - NET 30 days from receipt of invoice or date of acceptance, whichever is later.
 - b. Quantity: None
 - c. Dollar Volume: None
 - d. Government Educational Institutions: Government Educational Institutions are offered the same discounts as all other Government customers.
 - e. Other: None
8. **TRADE AGREEMENTS ACT OF 1979, AS AMENDED:** All items are U.S. made end products, designated country end products, Caribbean Basin country end products, Canadian end products, or Mexican end products as defined in the Trade Agreements Act of 1979, as amended.
9. **STATEMENT CONCERNING AVAILABILITY OF EXPORT PACKING:** Export packing is available at extra cost outside the scope of this contract.
10. **SMALL REQUIREMENTS:** The minimum dollar value of orders to be issued is \$100.00.
11. **MAXIMUM ORDER:** (All dollar amounts are exclusive of any discount for prompt payment.) The Maximum Order value for the following Special Item Numbers (SINs) is \$500,000:
Special Item Number 132-8 - Purchase of Equipment

Special Item 132-51 - Information Technology (IT) Professional Services
The maximum dollar value per order for all IT Professional services will be \$500,000
12. **USE OF FEDERAL SUPPLY SERVICE INFORMATION TECHNOLOGY SCHEDULE CONTRACTS.** In accordance with FAR 8.404:

[NOTE: Special ordering procedures have been established for Special Item Numbers (SINs) 132-51 IT Professional Services; refer to the terms and conditions for those SINs.]

Orders placed pursuant to a Multiple Award Schedule (MAS), using the procedures in FAR 8.404, are considered to be issued pursuant to full and open competition. Therefore, when placing orders under Federal Supply Schedules, ordering offices need not seek further competition, synopses the requirement, make a separate determination of fair and reasonable pricing, or consider small business set-asides in accordance with subpart 19.5. GSA has already determined the prices of items under schedule contracts to be fair and reasonable. By placing an order against a schedule using the procedures outlined below, the ordering office has concluded that the order represents the best value and results in the lowest overall cost alternative (considering price, special features, administrative costs, etc.) to meet the Government's needs.

a. Orders placed at or below the micro-purchase threshold. Ordering offices can place orders at or below the micro-purchase threshold with any Federal Supply Schedule Contractor.

b. Orders exceeding the micro-purchase threshold but not exceeding the maximum order threshold. Orders should be placed with the Schedule Contractor that can provide the supply or service that represents the best value. Before placing an order, ordering offices should consider reasonably available information about the supply or service offered under MAS contracts by using the “GSA Advantage!” on-line shopping service, or by reviewing the catalogs/pricelists of at least three Schedule Contractors and selecting the delivery and other options available under the schedule that meets the activity’s needs. In selecting the supply or service representing the best value, the ordering office may consider:

- (1) Special features of the supply or service that are required in effective program performance and that are not provided by a comparable supply or service;
- (2) Trade-in considerations;
- (3) Probable life of the item selected as compared with that of a comparable item;
- (4) Warranty considerations;
- (5) Maintenance availability;
- (6) Past performance; and
- (7) Environmental and energy efficiency considerations.

c. Orders exceeding the maximum order threshold. Each schedule contract has an established maximum order threshold. This threshold represents the point where it is advantageous for the ordering office to seek a price reduction. In addition to following the procedures in paragraph b, above, and before placing an order that exceeds the maximum order threshold, ordering offices shall--

- (1) Review additional Schedule Contractors’ catalogs/pricelists or use the “GSA Advantage!” on-line shopping service;
- (2) Based upon the initial evaluation, generally seek price reductions from the Schedule Contractor(s) appearing to provide the best value (considering price and other factors); and
- (3) After price reductions have been sought, place the order with the Schedule Contractor that provides the best value and results in the lowest overall cost alternative. If further price reductions are not offered, an order may still be placed, if the ordering office determines that it is appropriate.

NOTE: For orders exceeding the maximum order threshold, the Contractor may:

- (1) Offer a new lower price for this requirement (the Price Reductions clause is not applicable to orders placed over the maximum order in FAR 52.216-19 Order Limitations);
- (2) Offer the lowest price available under the contract; or
- (3) Decline the order (orders must be returned in accordance with FAR 52.216-19).

d. Blanket purchase agreements (BPAs). The establishment of Federal Supply Schedule BPAs is permitted when following the ordering procedures in FAR 8.404. All schedule contracts contain BPA provisions. Ordering offices may use BPAs to establish accounts with Contractors to fill recurring requirements. BPAs should address the frequency of ordering and invoicing, discounts, and delivery locations and times.

e. Price reductions. In addition to the circumstances outlined in paragraph c, above, there may be instances when ordering offices will find it advantageous to request a price reduction. For example, when the ordering office finds a schedule supply or service elsewhere at a lower price or when a BPA is being established to fill recurring requirements, requesting a price reduction could be advantageous. The potential volume of orders under these agreements, regardless of the size of the individual order, may offer the ordering office the opportunity to secure greater discounts. Schedule Contractors are not required to pass on to all schedule users a price reduction extended only to an individual activity for a specific order.

f. Small business. For orders exceeding the micro-purchase threshold, ordering offices should give preference to the items of small business concerns when two or more items at the same delivered price will satisfy the requirement.

g. Documentation. Orders should be documented, at a minimum, by identifying the Contractor the item was purchased from, the item purchased, and the amount paid. If an activity requirement in excess of the micro-purchase threshold is defined so as to require a particular brand name, product, or feature of a product peculiar to one manufacturer, thereby precluding consideration of a product manufactured by another company, the ordering office shall include an explanation in the file as to why the particular brand name, product, or feature is essential to satisfy the activity's needs.

13. FEDERAL INFORMATION TECHNOLOGY/TELECOMMUNICATION STANDARDS REQUIREMENTS: Federal departments and ordering activities acquiring products from this Schedule must comply with the provisions of the Federal Standards Program, as appropriate (reference: NIST Federal Standards Index). Inquiries to determine whether or not specific products listed herein comply with Federal Information Processing Standards (FIPS) or Federal Telecommunication Standards (FED-STDS), which are cited by ordering offices, shall be responded to promptly by the Contractor.

13.1 FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATIONS (FIPS PUBS): Information Technology products under this Schedule that do not conform to Federal Information Processing Standards (FIPS) should not be acquired unless a waiver has been granted in accordance with the applicable "FIPS Publication." Federal Information Processing Standards Publications (FIPS PUBS) are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST), pursuant to National Security Act. Information concerning their availability and applicability should be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161. FIPS PUBS include voluntary standards when these are adopted for Federal use. Individual orders for FIPS PUBS

should be referred to the NTIS Sales Office, and orders for subscription service should be referred to the NTIS Subscription Officer, both at the above address, or telephone number (703) 487-4650.

13.2 FEDERAL TELECOMMUNICATION STANDARDS (FED-STDS): Telecommunication products under this Schedule that do not conform to Federal Telecommunication Standards (FED-STDS) should not be acquired unless a waiver has been granted in accordance with the applicable "FED-STD." Federal Telecommunication Standards are issued by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST), pursuant to National Security Act. Ordering information and information concerning the availability of FED-STDS should be obtained from the GSA, Federal Supply Service, Specification Section, 470 East L'Enfant Plaza, Suite 8100, SW, Washington, DC 20407, telephone number (202)619-8925. Please include a self-addressed mailing label when requesting information by mail. Information concerning their applicability can be obtained by writing or calling the U.S. Department of Commerce, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone number (301)975-2833.

14. CONTRACTOR TASKS / SPECIAL REQUIREMENTS (C-FSS-370) (NOV 2001)

- (a) Security Clearances: The Contractor may be required to obtain/possess varying levels of security clearances in the performance of orders issued under this contract. All costs associated with obtaining/possessing such security clearances should be factored into the price offered under the Multiple Award Schedule.
- (b) Travel: The Contractor may be required to travel in performance of orders issued under this contract. Allowable travel and per diem charges are governed by Pub .L. 99-234 and FAR Part 31, and are reimbursable by the ordering activity or can be priced as a fixed price item on orders placed under the Multiple Award Schedule. The Industrial Funding Fee does NOT apply to travel and per diem charges.
- (c) Certifications, Licenses and Accreditations: As a commercial practice, the Contractor may be required to obtain/possess any variety of certifications, licenses and accreditations for specific FSC/service code classifications offered. All costs associated with obtaining/ possessing such certifications, licenses and accreditations should be factored into the price offered under the Multiple Award Schedule program.
- (d) Insurance: As a commercial practice, the Contractor may be required to obtain/possess insurance coverage for specific FSC/service code classifications offered. All costs associated with obtaining/possessing such insurance should be factored into the price offered under the Multiple Award Schedule program.
- (e) Personnel: The Contractor may be required to provide key personnel, resumes or skill category descriptions in the performance of orders issued under this contract. Ordering activities may require activity approval of additions or replacements to key personnel.
- (f) Organizational Conflicts of Interest: Where there may be an organizational conflict of interest as determined by the ordering activity, the Contractor's participation in such order may be restricted in accordance with FAR Part 9.5.
- (g) Documentation/Standards: The Contractor may be requested to provide products or services in accordance with rules, regulations, OMB orders, standards and documentation as specified by the activity's order.

- (h) Data/Deliverable Requirements: Any required data/deliverables at the ordering level will be as specified or negotiated in the activity's order.
- (i) Government-Furnished Property: As specified by the activity's order, the Government may provide property, equipment, materials or resources as necessary.
- (j) Availability of Funds: Many ordering activities operating funds are appropriated for a specific fiscal year. Funds may not be presently available for any orders placed under the contract or any option year. The Government's obligation on orders placed under this contract is contingent upon the availability of appropriated funds from which payment for ordering purposes can be made. No legal liability on the part of the Government for any payment may arise until funds are available to the ordering Contracting Officer.

15. CONTRACT ADMINISTRATION FOR ORDERING ACTIVITIES: Any ordering activity, with respect to any one or more delivery orders placed by it under this contract, may exercise the same rights of termination as might the GSA Contracting Officer under provisions of FAR 52.212-4, paragraphs (l) Termination for the ordering activity's convenience, and (m) Termination for Cause (See C.1.)

16. GSA ADVANTAGE!: *GSA Advantage!* is an on-line, interactive electronic information and ordering system that provides on-line access to vendors' schedule prices with ordering information. *GSA Advantage!* Will allow the user to perform various searches across all contracts including, but not limited to:

- (a) Manufacturer
- (b) Manufacturer's Part Number; and
- (c) Product category(ies).

Agencies can browse *GSA Advantage!* by accessing the Internet World Wide Web utilizing a browser (ex: NetScape). The Internet address is <http://www.fss.gsa.gov>.

17. PURCHASE OF OPEN MARKET ITEMS

NOTE: Open Market Items are also known as incidental items, noncontract items, non-Schedule items, and items not on a Federal Supply Schedule contract. ODCs (Other Direct Costs) are not part of this contract and should be treated at open market purchases. Ordering Activities procuring open market items must follow FAR 8.401(d).

For administrative convenience, an ordering activity contracting officer may add items not on the Federal Supply Multiple Award Schedule (MAS) -- referred to as open market items -- to a Federal Supply Schedule blanket purchase agreement (BPA) or an individual task or delivery order, **only if-**

- (1) All applicable acquisition regulations pertaining to the purchase of the items not on the Federal Supply Schedule have been followed (e.g., publicizing (Part 5), competition requirements (Part 6), acquisition of commercial items (Part 12), contracting methods (Parts 13, 14, and 15), and small business programs (Part 19));
- (2) The ordering activity contracting officer has determined the price for the items not on the Federal Supply Schedule is fair and reasonable;
- (3) The items are clearly labeled on the order as items not on the Federal Supply Schedule; and

(4) All clauses applicable to items not on the Federal Supply Schedule are included in the order.

18. CONTRACTOR COMMITMENTS, WARRANTIES AND REPRESENTATIONS:

- a. For the purpose of this contract, commitments, warranties and representations include, in addition to those agreed to for the entire schedule contract:
 - (1) Time of delivery/installation quotations for individual orders;
 - (2) Technical representations and/or warranties of products concerning performance, total system performance and/or configuration, physical, design and/or functional characteristics and capabilities of a product/equipment/ service/software package submitted in response to requirements which result in orders under this schedule contract.
 - (3) Any representations and/or warranties concerning the products made in any literature, description, drawings and/or specifications furnished by the contractor.
- b. The above is not intended to encompass items not currently covered by the GSA Schedule Contract.

19. OVERSEAS ACTIVITIES:

The terms and conditions of this contract shall apply to all orders for installation, maintenance and repair of equipment in areas listed in the pricelist outside the 48 contiguous states and the District of Columbia, except as indicated below: N/A

Upon request of the Contractor, the ordering activity may provide the Contractor with logistics support, as available, in accordance with all applicable ordering activity regulations. Such ordering activity support will be provided on a reimbursable basis, and will only be provided to the Contractor's technical personnel whose services are exclusively required for the fulfillment of the terms and conditions of this contract.

20. BLANKET PURCHASE AGREEMENTS (BPAs)

Federal Acquisition Regulation (FAR) 13.201(a) defines Blanket Purchase Agreements (BPAs) as "...a simplified method of filling anticipated repetitive needs for supplies or services by establishing 'charge accounts' with qualified sources of supply." The use of Blanket Purchase Agreements under the Federal Supply Schedule Program is authorized in accordance with FAR 13.202(c)(3), which reads, in part, as follows:

"BPAs may be established with Federal Supply Schedule Contractors, if not inconsistent with the terms of the applicable schedule contract."

Federal Supply Schedule contracts contain BPA provisions to enable schedule users to maximize their administrative and purchasing savings. This feature permits schedule users to set up "accounts" with Schedule Contractors to fill recurring requirements. These accounts establish a period for the BPA and generally address issues such as the frequency of ordering and invoicing,

authorized callers, discounts, delivery locations and times. Agencies may qualify for the best quantity/volume discounts available under the contract, based on the potential volume of business that may be generated through such an agreement, regardless of the size of the individual orders. In addition, agencies may be able to secure a discount higher than that available in the contract based on the aggregate volume of business possible under a BPA. Finally, Contractors may be open to a progressive type of discounting where the discount would increase once the sales accumulated under the BPA reach certain prescribed levels. Use of a BPA may be particularly useful with the new Maximum Order feature. See the Suggested Format, contained in this Schedule Pricelist, for customers to consider when using this purchasing tool.

21. CONTRACTOR TEAM ARRANGEMENTS

Contractors participating in contractor team arrangements must abide by all terms and conditions of their respective contracts. This includes compliance with Clauses 552.238-74, Industrial Funding Fee and Sales Reporting, i.e., each contractor (team member) must report sales and remit the IFF for all products and services provided under its individual contract.

22. INSTALLATION, DEINSTALLATION, REINSTALLATION

The Davis-Bacon Act (40 U.S.C. 276a-276a-7) provides that contracts in excess of \$2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating) of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall received less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act apply.

The requisitioning activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act. The proper Davis-Bacon wage determination will be issued by the ordering activity at the time a request for quotations is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 132-8.

23. SECTION 508 COMPLIANCE

If applicable, Section 508 compliance information on the supplies and services in this contract are available in Electronic and Information Technology (EIT) at the following: www.delta-sec.com

24. PRIME CONTRACTOR ORDERING FROM FEDERAL SUPPLY SCHEDULES.

Prime Contractors (on cost reimbursement contracts) placing orders under Federal Supply Schedules, on behalf of an ordering activity, shall follow the terms of the applicable schedule and authorization and include with each order –

- (a) A copy of the authorization from the ordering activity with whom the contractor has the prime contract (unless a copy was previously furnished to the Federal Supply Schedule contractor); and
- (b) The following statement:

This order is placed under written authorization from _____ dated _____. In the event of any inconsistency between the terms and conditions of this order and those of your Federal Supply Schedule contract, the latter will govern.

25. INSURANCE-WORK ON A GOVERNMENT INSTALLATION (JAN 1997)(FAR 52.228-5)

- (a) The Contractor shall, at its own expense, provide and maintain during the entire performance of this contract, at least the kinds and minimum amounts of insurance required in the Schedule or elsewhere in the contract.
- (b) Before commencing work under this contract, the Contractor shall notify the Contracting Officer in writing that the required insurance has been obtained. The policies evidencing required insurance shall contain an endorsement to the effect that any cancellation or any material change adversely affecting the Government's interest shall not be effective—
 - (1) For such period as the laws of the State in which this contract is to be performed prescribe; or
 - (2) Until 30 days after the insurer or the Contractor gives written notice to the Contracting Officer, whichever period is longer.
- (c) The Contractor shall insert the substance of this clause, including this paragraph (c), in subcontracts under this contract that require work on a Government installation and shall require subcontractors to provide and maintain the insurance required in the Schedule or elsewhere in the contract. The Contractor shall maintain a copy of all subcontractors' proofs of required insurance, and shall make copies available to the Contracting Officer upon request.

**TERMS AND CONDITIONS APPLICABLE TO PURCHASE OF
GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT
(SPECIAL ITEM NUMBER 132-8)**

1. MATERIAL AND WORKMANSHIP

All equipment furnished hereunder must satisfactorily perform the function for which it is intended.

2. ORDER

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPA) agreements shall be the basis for purchase in accordance with the provisions of this contract. If time of delivery extends beyond the expiration date of the contract, the Contractor will be obligated to meet the delivery and installation date specified in the original order.

For credit card orders and BPAs, telephone orders are permissible.

3. TRANSPORTATION OF EQUIPMENT

FOB DESTINATION. Prices cover equipment delivery to destination, for any location within the geographic scope of this contract.

4. INSTALLATION AND TECHNICAL SERVICES

a. **INSTALLATION.** The equipment provided under this contract is self-installable. However, outside the scope of this Contract, the Contractor's technical personnel shall be available to the Government, at the Government's location, to install the equipment and to train Government personnel in the use and maintenance of the equipment. Please call Delta Security Technologies, Inc. for pricing and availability.

b. **INSTALLATION, DEINSTALLATION, REINSTALLATION.** The Davis-Bacon Act (40 U.S.C. 276a-276a-7) provides that contracts in excess of \$2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating) of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall received less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds \$2,000, then the requirements of the Davis-Bacon Act apply.

The ordering activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act. The proper Davis-Bacon wage determination will be issued by the ordering activity at the time a request for quotations is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 132-8.

c. **OPERATING AND MAINTENANCE MANUALS.** The Contractor shall furnish the ordering activity with one (1) copy of all operating and maintenance manuals which are normally provided with the equipment being purchased.

5. INSPECTION/ACCEPTANCE

The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any equipment that has been tendered for acceptance. The Government may require repair or replacement of nonconforming equipment at no increase in contract price. The Government must exercise its postacceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

6. WARRANTY

a. Unless specified otherwise in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist will apply to this contract.

b. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

c. **Limitation of Liability.** The Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items except as otherwise provided by an express or implied warranty.

d. If inspection and repair of defective equipment under this warranty will be performed at the Contractor's plant, the address is as follows: Delta Security Technologies, Inc. Building 9313, Suite 144, Stennis Base Center, MS 39529.

7. PURCHASE PRICE FOR ORDERED EQUIPMENT

The purchase price that the ordering activity will be charged will be the ordering activity purchase price in effect at the time of order placement, or the ordering activity purchase price in effect on the installation date (or delivery date when installation is not applicable), whichever is less.

8. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City or otherwise) covering work of this character, and shall include all costs, if any, of such compliance in the prices quoted in this offer.

9. TRADE-IN OF INFORMATION TECHNOLOGY EQUIPMENT

When an ordering activity determines that Information Technology equipment will be replaced, the ordering activity shall follow the contracting policies and procedures in the Federal Acquisition Regulation (FAR), the policies and procedures regarding disposition of information technology excess personal property in the Federal Property Management Regulations (FPMR) (41 CFR 101-43.6), and the policies and procedures on exchange/sale contained in the FPMR (41 CFR part 101-46).

**TERMS AND CONDITIONS APPLICABLE TO INFORMATION TECHNOLOGY (IT)
PROFESSIONAL SERVICES (SPECIAL ITEM 132-51)**

1. SCOPE

- a. The prices, terms and conditions stated under Special Item Number 132-51 Information Technology Professional Services and Special Item Number 132-52 Electronic Commerce Services apply exclusively to IT/EC Services within the scope of this Information Technology Schedule.
- b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. PERFORMANCE INCENTIVES

- a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract in accordance with this clause.
- b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
- c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

**3. ORDERING PROCEDURES FOR SERVICES (REQUIRING A STATEMENT OF WORK)
(G-FCI-920) (MAR 2003)**

FAR 8.402 contemplates that GSA may occasionally find it necessary to establish special ordering procedures for individual Federal Supply Schedules or for some Special Item Numbers (SINs) within a Schedule. GSA has established special ordering procedures for services that require a Statement of Work. These special ordering procedures take precedence over the procedures in FAR 8.404 (b)(2) through (b)(3).

When ordering services over \$100,000, Department of Defense (DOD) ordering offices and non-DOD ordering activities placing orders on behalf of the DOD must follow the policies and procedures in the Defense Federal Acquisition Regulation Supplement (DFARS) 208.404-70 – Additional ordering procedures for services. When DFARS 208.404-70 is applicable and there is a conflict between the ordering procedures contained in this clause and the additional ordering procedures for services in DFARS 208.404-70, the DFARS procedures take precedence.

GSA has determined that the prices for services contained in the contractor's price list applicable to this Schedule are fair and reasonable. However, the ordering activity using this contract is responsible for considering the level of effort and mix of labor proposed to perform a specific task being ordered and for making a determination that the total firm-fixed price or ceiling price is fair and reasonable.

- (a) When ordering services, ordering activities shall—
 - (1) Prepare a Request (Request for Quote or other communication tool):
 - (i) A statement of work (a performance-based statement of work is preferred) that outlines, at a minimum, the work to be performed, location of work, period of

performance, deliverable schedule, applicable standards, acceptance criteria, and any special requirements (i.e., security clearances, travel, special knowledge, etc.) should be prepared.

(ii) The request should include the statement of work and request the contractors to submit either a firm-fixed price or a ceiling price to provide the services outlined in the statement of work. A firm-fixed price order shall be requested, unless the ordering activity makes a determination that it is not possible at the time of placing the order to estimate accurately the extent or duration of the work or to anticipate cost with any reasonable degree of confidence. When such a determination is made, a labor hour or time-and-materials proposal may be requested. The firm-fixed price shall be based on the rates in the schedule contract and shall consider the mix of labor categories and level of effort required to perform the services described in the statement of work. The firm-fixed price of the order should also include any travel costs or other incidental costs related to performance of the services ordered, unless the order provides for reimbursement of travel costs at the rates provided in the Federal Travel or Joint Travel Regulations. A ceiling price must be established for labor-hour and time-and-materials orders.

(iii) The request may ask the contractors, if necessary or appropriate, to submit a project plan for performing the task, and information on the contractor's experience and/or past performance performing similar tasks.

(iv) The request shall notify the contractors what basis will be used for selecting the contractor to receive the order. The notice shall include the basis for determining whether the contractors are technically qualified and provide an explanation regarding the intended use of any experience and/or past performance information in determining technical qualification of responses. If consideration will be limited to schedule contractors who are small business concerns as permitted by paragraph (2) below, the request shall notify the contractors that will be the case.

(2) Transmit the Request to Contractors:

Based upon an initial evaluation of catalogs and price lists, the ordering activity should identify the contractors that appear to offer the best value (considering the scope of services offered, pricing and other factors such as contractors' locations, as appropriate) and transmit the request as follows:

NOTE: When buying IT professional services under SIN 132—51 ONLY, the ordering office, at its discretion, may limit consideration to those schedule contractors that are small business concerns. This limitation is not applicable when buying supplies and/or services under other SINS as well as SIN 132-51. The limitation may only be used when at least three (3) small businesses that appear to offer services that will meet the activity's needs are available, if the order is estimated to exceed the micro-purchase threshold.

(i) The request should be provided to at least three (3) contractors if the proposed order is estimated to exceed the micro-purchase threshold, but not exceed the maximum order threshold.

(ii) For proposed orders exceeding the maximum order threshold, the request should be provided to additional contractors that offer services that will meet the ordering activity's needs.

(iii) In addition, the request shall be provided to any contractor who specifically requests a copy of the request for the proposed order.

(iv) Ordering activities should strive to minimize the contractors' costs associated with responding to requests for quotes for specific orders. Requests should be tailored to the minimum level necessary for adequate evaluation and selection for order placement. Oral presentations should be considered, when possible.

(3) Evaluate Responses and Select the Contractor to Receive the Order:

After responses have been evaluated against the factors identified in the request, the order should be placed with the schedule contractor that represents the best value. (See FAR 8.404)

(b) The establishment of Federal Supply Schedule Blanket Purchase Agreements (BPAs) for recurring services is permitted when the procedures outlined herein are followed. All BPAs for services must define the services that may be ordered under the BPA, along with delivery or performance time frames, billing procedures, etc. The potential volume of orders under BPAs, regardless of the size of individual orders, may offer the ordering activity the opportunity to secure volume discounts. When establishing BPAs, ordering activities shall—

(1) Inform contractors in the request (based on the ordering activity's requirement) if a single BPA or multiple BPAs will be established, and indicate the basis that will be used for selecting the contractors to be awarded the BPAs.

(i) SINGLE BPA: Generally, a single BPA should be established when the ordering activity can define the tasks to be ordered under the BPA and establish a firm-fixed price or ceiling price for individual tasks or services to be ordered. When this occurs, authorized users may place the order directly under the established BPA when the need for service arises. The schedule contractor that represents the best value should be awarded the BPA. (See FAR 8.404)

(ii) MULTIPLE BPAs: When the ordering activity determines multiple BPAs are needed to meet its requirements, the ordering activity should determine which contractors can meet any technical qualifications before establishing the BPAs. When establishing the BPAs, the procedures in (a)(2) above must be followed. The procedures at (a)(2) do not apply to orders issued under multiple BPAs. Authorized users must transmit the request for quote for an order to all BPA holders and then place the order with the Schedule contractor that represents the best value.

(2) Review BPAs Periodically: Such reviews shall be conducted at least annually. The purpose of the review is to determine whether the BPA still represents the best value. (See FAR 8.404)

(c) The ordering activity should give preference to small business concerns when two or more contractors can provide the services at the same firm-fixed price or ceiling price.

(d) When the ordering activity's requirement involves both products as well as executive, administrative and/or professional, services, the ordering activity should total the prices for the products and the firm-fixed price for the services and select the contractor that represents the best value. (See FAR 8.404)

(e) The ordering activity, at a minimum, should document orders by identifying the contractor from which the services were purchased, the services purchased, and the amount paid. If other than a firm-fixed price order is placed, such documentation should include the basis for the determination to use a labor-hour or time-and-materials order. For ordering activity requirements in excess of the micro-purchase threshold, the order file should document the evaluation of Schedule contractors' quotes that formed the basis for the selection of the contractor that received the order and the rationale for any trade-offs made in making the selection.

4. ORDER

- a. Ordering Activities may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
- b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

5. PERFORMANCE OF SERVICES

- a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
- b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
- c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
- d. Any Contractor travel required in the performance of IT/EC Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

6. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)

- (a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-
 - (1) Cancel the stop-work order; or
 - (2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

- (b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-
 - (1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
 - (2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.
- (c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.
- (d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

7. INSPECTION OF SERVICES

The Inspection of Services–Fixed Price (AUG 1996) clause at FAR 52.246-4 applies to firm-fixed price orders placed under this contract. The Inspection–Time-and-Materials and Labor-Hour (JAN 1986) clause at FAR 52.246-6 applies to time-and-materials and labor-hour orders placed under this contract.

8. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Deviation – May 2003) Rights in Data – General, may apply.

9. RESPONSIBILITIES OF THE ORDERING ACTIVITY

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT/EC Services.

8. INDEPENDENT CONTRACTOR

All IT Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the Government.

11. ORGANIZATIONAL CONFLICTS OF INTEREST

a. Definitions.

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

12. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for IT/EC services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

13. PAYMENTS

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.232-7 (DEC 2002), (Alternate II – Feb 2002) (Deviation – May 2003) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.232-7 (DEC 2002), (Alternate II – Feb 2002) (Deviation – May 2003)) applies to labor-hour orders placed under this contract.

14. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

15. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

16. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

17. DESCRIPTION OF IT/EC SERVICES AND PRICING

DELTA SECURITY TECHNOLOGIES, INC. provides the following types of services: IT Facility Operation and Maintenance; IT Systems Analysis Services; Automated Information Services Design and Integration Services; Programming Services; IT Data Conversion Services; Computer Aided Design/Computer Aided Manufacturing (CAD/CAM) Services; and IT Network Management Services.

**USA COMMITMENT TO PROMOTE
SMALL BUSINESS PARTICIPATION
PROCUREMENT PROGRAMS**

PREAMBLE

DELTA SECURITY TECHNOLOGIES, INC. provides commercial products and services to the Federal Government. We are committed to promoting participation of small, small disadvantaged and women-owned small businesses in our contracts. We pledge to provide opportunities to the small business community through reselling opportunities, mentor-protégé programs, joint ventures, teaming arrangements, and subcontracting.

COMMITMENT

To actively seek and partner with small businesses.

To identify, qualify, mentor and develop small, small disadvantaged and women-owned small businesses by purchasing from these businesses whenever practical.

To develop and promote company policy initiatives that demonstrate our support for awarding contracts and subcontracts to small business concerns.

To undertake significant efforts to determine the potential of small, small disadvantaged and women-owned small business to supply products and services to our company.

To insure procurement opportunities are designed to permit the maximum possible participation of small, small disadvantaged, and women-owned small businesses.

To attend business opportunity workshops, minority business enterprise seminars, trade fairs, procurement conferences, etc., to identify and increase small businesses with whom to partner.

To publicize in our marketing publications our interest in meeting small businesses that may be interested in subcontracting opportunities.

We signify our commitment to work in partnership with small, small disadvantaged and women-owned small businesses to promote and increase their participation in ordering activity contracts. To accelerate potential opportunities please contact: Robert H. Clime, President, rclime@delta-sec.com, (703) 751-9515, (703) 751-6123 (Fax); or, JoAnn Flyntz, (703) 751-9515, CEO, jmflyntz@delta-sec.com.

**DELTA SECURITY TECHNOLOGIES, INC.
BLANKET PURCHASE AGREEMENT**

Pursuant to GSA Federal Supply Schedule Contract Number(s) _____, Blanket Purchase Agreements, the Contractor agrees to the following terms of a Blanket Purchase Agreement (BPA) EXCLUSIVELY WITH (ordering activity):

(1) The following contract items can be ordered under this BPA. All orders placed against this BPA are subject to the terms and conditions of the contract, except as noted below:

MODEL NUMBER/PART NUMBER	*SPECIAL
BPA DISCOUNT/PRICE	
_____	_____
_____	_____
_____	_____

(2) Delivery:

DESTINATION	DELIVERY SCHEDULES / DATES
_____	_____
_____	_____
_____	_____

(3) The ordering activity estimates, but does not guarantee, that the volume of purchases through this agreement will be _____.

(4) This BPA does not obligate any funds.

(5) This BPA expires on _____ or at the end of the contract period, whichever is earlier.

(6) The following office(s) is hereby authorized to place orders under this BPA:

OFFICE	POINT OF CONTACT
_____	_____
_____	_____
_____	_____

(7) Orders will be placed against this BPA via Electronic Data Interchange (EDI), FAX, or paper.

(8) Unless otherwise agreed to, all deliveries under this BPA must be accompanied by delivery tickets or sales slips that must contain the following information as a minimum:

- a. Name of Contractor;
- b. Contract Number;
- c. BPA Number;
- d. Model Number or National Stock Number (NSN);
- e. Purchase Order Number;
- f. Date of Purchase;

g. Quantity, Unit Price, and Extension of Each Item (unit prices and extensions need not be shown when incompatible with the use of automated systems; provided, that the invoice is itemized to show the information); and

h. Date of Shipment.

(9) The requirements of a proper invoice are specified in the Federal Supply Schedule contract. Invoices will be submitted to the address specified within the purchase order transmission issued against this BPA.

(10) The terms and conditions included in this BPA apply to all purchases made pursuant to it. In the event of an inconsistency between the provisions of this BPA and the Contractor's invoice, the provisions of this BPA will take precedence.

**BASIC GUIDELINES FOR USING
“CONTRACTOR TEAM ARRANGEMENTS”**

Federal Supply Schedule Contractors may use “Contractor Team Arrangements” (see FAR 9.6) to provide solutions when responding to ordering activity requirements.

These Team Arrangements can be included under a Blanket Purchase Agreement (BPA). BPAs are permitted under all Federal Supply Schedule contracts.

Orders under a Team Arrangement are subject to terms and conditions of the Federal Supply Schedule Contract.

Participation in a Team Arrangement is limited to Federal Supply Schedule Contractors.

Customers should refer to FAR 9.6 for specific details on Team Arrangements.

Here is a general outline on how it works:

- The customer identifies their requirements.
- Federal Supply Schedule Contractors may individually meet the customer's needs, or -
- Federal Supply Schedule Contractors may individually submit a Schedules “Team Solution” to meet the customer’s requirement.
- Customers make a best value selection.

DELTA SECURITY TECHNOLOGIES, INC.
Services Skill Category Descriptions

SENIOR TECHNICAL MANAGER

CLIN 0001

GENERAL SUMMARY

Directs, plans, manages, and participates in major Information Technology (IT) projects including the design, development, integration, installation, and testing of data processing, network, and information security hardware, software, and systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Directs, plans and manages major projects that include the development and procurement of hardware, software, and systems used for data processing, network communications, and/or information security.
2. Participates in and provides the technical leadership for the design, procurement, integration, installation, and testing of hardware, software, and systems used for data processing, network communications, and/or information security.
3. Directs the selection of assigned personnel, schedule/budget requirements, and performance monitoring and reporting requirements of assigned projects.
4. Operates as the technical director for complex technical tasks on IT projects.
5. Directs technical personnel in identifying solutions to difficult technical problems in the IT disciplines.
6. Identifies IT resources including hardware, software, facilities, and personnel categories required for project completion.
7. Develops and defines the requirements for the protection of intellectual property developed or utilized during the course of the project.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree in an engineering, scientific, technical, business, or other appropriate discipline, and a minimum of 15 years of related experience. At least 3 years experience must be as a senior level technical manager of an IT Project that included the duties and responsibilities described above.

SENIOR NETWORK SECURITY ANALYST

CLIN 0002

GENERAL SUMMARY

Leads and participates in major Information Security projects including the design, development, procurement, integration, installation, evaluation and testing of information security hardware, software, and systems used in Local Area Network (LAN) and Wide Area Network (WAN) systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the design, development, and testing of hardware, software, and security systems used for securing data processing, LAN, and WAN systems.
2. Leads and participates in the selection and acquisition of Commercial-Off-The-Shelf (COTS) software, hardware, and security systems required for securing data processing, LAN, and WAN systems.
3. Leads and participates in the evaluation of security vulnerabilities associated with data processing, LAN, and WAN systems.
4. Leads and participates in the evaluation of data processing, LAN, and WAN security software, hardware, and systems against identified operational and performance requirements.
5. Leads and participates in the integration and installation of hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
6. Leads and participates in the implementation of engineering support and maintenance of hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
7. Leads and participates in operations and maintenance training for hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree in engineering, computer science, physics, math or a related discipline, and a minimum of 10 years of experience in implementing the above duties and responsibilities.

NETWORK SECURITY ANALYST

CLIN 0003

GENERAL SUMMARY

Participates in major Information Security projects including the design, development, procurement, integration, installation, evaluation and testing of information security hardware, software, and systems used in Local Area Network (LAN) and Wide Area Network (WAN) systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the design, development, and testing of hardware, software, and security systems used for securing data processing, LAN, and WAN systems.
2. Participates in the selection and acquisition of Commercial-Off-The-Shelf (COTS) software, hardware, and security systems required for securing data processing, LAN, and WAN systems.
3. Participates in the evaluation of security vulnerabilities associated with data processing, LAN, and WAN systems.
4. Participates in the evaluation of data processing, LAN, and WAN security software, hardware, and systems against identified operational and performance requirements.
5. Participates in the integration and installation of hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
6. Participates in the implementation of engineering support and maintenance of hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
7. Participates in operations and maintenance training for hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree in engineering, computer science, physics, math or a related discipline, and a minimum of 6 years of experience in implementing the above duties and responsibilities.

JUNIOR NETWORK SECURITY ANALYST

CLIN 0004

GENERAL SUMMARY

Participates in major Information Security projects including the design, development, procurement, integration, installation, evaluation and testing of information security hardware, software, and systems used in Local Area Network (LAN) and Wide Area Network (WAN) systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the design, development, and testing of hardware, software, and security systems used for securing data processing, LAN, and WAN systems.
2. Participates in the selection and acquisition of Commercial-Off-The-Shelf (COTS) software, hardware, and security systems required for securing data processing, LAN, and WAN systems.
3. Participates in the evaluation of security vulnerabilities associated with data processing, LAN, and WAN systems.

5. Participates in the integration and installation of hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
6. Participates in the implementation of engineering support and maintenance of hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
7. Participates in operations and maintenance training for hardware, software, and security systems used to secure data processing, LAN, and WAN systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree in engineering, computer science, physics, math or a related discipline and 1 to 6 years of experience in implementing any of the above duties and responsibilities.

SENIOR SECURITY SPECIALIST

CLIN 0005

GENERAL SUMMARY

Leads and participates in Security Support projects involving the security disciplines of Operations Security (OPSEC), Signal Security (SIGSEC), Communications Security (COMSEC), and Automated Information System (AIS) security.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the performance of security risk assessments, system threat assessments, vulnerability assessments, and penetration analyses of facilities, Automated Information Systems and networks.
2. Leads and participates in the development and preparation of OPSEC Plans, Security Plans, Tempest Plans, and Vulnerability Assessments.
3. Leads and participates in the evaluation of AIS and Network access control, data integrity, and system virus and worm countermeasures associated with data processing, LAN, and WAN systems.
4. Leads and participates in the use of state-of-the-art security evaluation and assessment technology, techniques, and tools to perform the above duties.
5. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree from an accredited college or university and a minimum of eight (8) years recent experience in the disciplines of Operations Security (OPSEC), Signal Security (SIGSEC), Communications Security (COMSEC), and Automated Information System (AIS) security. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the four (4) year degree requirement.

CLIN 0010

GENERAL SUMMARY

Participates in Information Technology projects including the design, development, procurement, integration, installation, evaluation and testing of Local Area Network (LAN) and Wide Area Network (WAN) based systems, hardware, and software.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the design, development, and testing of hardware, software, and systems used as integral components of LAN, and WAN data communication systems.
2. Participates in the evaluation, selection and acquisition of Commercial-Off-The-Shelf (COTS) software, hardware, and systems used as integral components in LAN and WAN data communication systems.
3. Participates in the evaluation of LAN and WAN communications software, hardware, and systems against identified operational and performance requirements.
4. Participates in the integration and installation of hardware, software, and systems used as components in LAN and WAN data communications systems.
5. Participates in the development and implementation of solutions used to improve the performance and operation of LAN and WAN software, hardware, and systems.
6. Participates in the implementation of engineering support and maintenance of hardware, software, and systems used in LAN and WAN data communications systems.
7. Participates in operations and maintenance training for hardware, software, and systems used in LAN and WAN data communications systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree in engineering, computer science, physics, math, management or a related discipline and a minimum of 1 to 6 years of experience in implementing any of the above duties and responsibilities.

SENIOR SYSTEMS ENGINEER

CLIN 0011

GENERAL SUMMARY

Leads and participates in Information Technology projects including the design, development, procurement, integration, installation, evaluation and testing of Local Area Network (LAN) and Wide Area Network (WAN) based systems, hardware, and software.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the performance of complex technical work.
2. Leads and participates in the conceptualization, planning, and coordination of technical projects.
3. Leads and participates in problem definition for complex technical projects.
4. Leads and participates in the design and implementation of computer and communication systems.
5. May perform other duties as assigned.

JOB SPECIFICATIONS

Doctorate degree with a minimum of 10 years experience or equivalent, or Masters degree with a minimum of 12 years of experience equivalent, or a Bachelors degree with a minimum of 14 years of experience or equivalent in the performance of the duties described above.

SENIOR ENGINEER

CLIN 0012

GENERAL SUMMARY

Leads and participates in the technical analysis, evaluation, and overall support of advanced electronics and avionics programs and technologies in the areas of Electronic Warfare, Communications, and Automated Information Systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the technical analysis and evaluation of advanced electronics programs and technologies..
2. Leads and participates in the technical analysis and evaluation of advanced avionics programs and technologies.
3. Leads and participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Electronic Warfare Programs.
4. Leads and participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Communications Programs.
5. Leads and participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Automated Information System Programs.
6. May perform other duties as assigned.

JOB SPECIFICATIONS

Masters degree from an accredited college or university in an engineering discipline and a minimum of ten (10) years recent experience in the technical support of major Navy or other U.S. government programs.

ENGINEER

CLIN 0013

GENERAL SUMMARY

Participates in the technical analysis and evaluation of advanced electronics and avionics programs and technologies in the areas of Electronic Warfare, Communications, and Automated Information Systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the technical analysis and evaluation of advanced electronics programs and technologies..
2. Participates in the technical analysis and evaluation of advanced avionics programs and technologies.
3. Participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Electronic Warfare Programs.
4. Participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Communications Programs.
5. Participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Automated Information System Programs.
6. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited college or university in an engineering discipline and a minimum of six (6) years recent experience in the technical support of Navy or other U.S. government ship or aircraft programs.

JUNIOR ENGINEER

CLIN 0014

GENERAL SUMMARY

Participates in the technical analysis and evaluation of advanced electronics and avionics programs and technologies in the areas of Electronic Warfare, Communications, and Automated Information Systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the technical analysis and evaluation of advanced electronics programs and technologies..
2. Participates in the technical analysis and evaluation of advanced avionics programs and technologies.
3. Participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Electronic Warfare Programs.
4. Participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Communications Programs.
5. Participates in the design, development, test and evaluation, and production support for Navy and U.S. Government Automated Information System Programs.
6. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited college or university in an engineering discipline and a minimum of two (2) years recent experience in the technical support of Navy or other U.S. government ship or aircraft programs.

JUNIOR INTERDISCIPLINARY ENGINEER

CLIN 0015

GENERAL SUMMARY

Leads and participates in Information Technology projects including the design, development, procurement, integration, installation, evaluation and testing of Local Area Network (LAN) and Wide Area Network (WAN) based systems, hardware, and software.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the translation of technical requirements and problems into solutions employing current state-of-the-art equipment and software.
2. Participates in the definition of the interaction/interface between different categories of requirements.
3. Participates in the development, implementation, and revision of technical plans for supporting project requirements.
4. Participates as the liaison to interpret and translate the various technical disciplines on a project or task team.
5. Participates as the Point of Contact for the evaluation, resolution, and administration of problems arising from the interdisciplinary nature of a project or task.
6. Participates in the performance of electrical or structural modifications and related services in support of a system platform.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Associates degree plus one year educational training for specialized skill capabilities or Bachelors degree, or equivalent specialized training or technical licenses and at least four (4) years of experience in technical work in the areas of system management and system integration.

SENIOR SYSTEMS ANALYST

CLIN 0016

GENERAL SUMMARY

Leads and participates in the systems analysis, business process reengineering, and the definition of operational requirements for complex Automated Information Systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the analysis and evaluation of system hardware, software, and firmware used as integral components of Automated Information Systems.
2. Leads and participates in the business process reengineering of complex Automated Information Systems.
3. Leads and participates in the definition of operational and business process requirements for new and modified Automated Information Systems.
4. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors degree in Business, Engineering, Computer Science, or a related discipline and a minimum of 4 years of specialized experience in systems analysis or programming experience that includes Structured Analysis and Design Techniques (SADT).

SYSTEMS ANALYST

CLIN 0017

GENERAL SUMMARY

Leads and participates in Information Technology projects including the design, development, procurement, integration, installation, evaluation and testing of Local Area Network (LAN) and Wide Area Network (WAN) based systems, hardware, and software.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the design or supports design evaluations of software for complex DoD weapon systems.
2. Participates in the development or supports the evaluation of the development process for the software developed for complex DoD weapon systems.
3. Participates in the test and evaluation or supports the evaluation of the test and evaluation process of software used in complex DoD weapon systems.
4. Participates in the utilization and evaluation of Computer Aided Software Engineering (CASE) technologies.
5. Participates in the utilization and evaluation of Structured Software Development techniques and technologies.
6. Participates in the utilization and evaluation of Object Oriented Analysis and Development techniques and technologies.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree in computer science or an engineering discipline with at least six (6) years experience in the design, development, and test and evaluation of software for complex DoD weapon systems.

SENIOR PROGRAM ANALYST

CLIN 0018

GENERAL SUMMARY

Leads and participates in the Financial, Schedule, Cost, and/or Configuration/Data Management of major Information Technology (IT) projects.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the development and/or selection of the Project Management schedule and cost management techniques, procedures, and systems used on IT projects.
2. Leads and participates in the development and/or selection of the Configuration Management (CM) and Data Management (DM) techniques, procedures, and systems used on IT projects.
3. Leads and participates in the development of the formal budget and schedule for IT projects.
4. Leads and participates in the monitoring and evaluation of project cost, schedule, and CM/DM status and problems on IT projects.
5. Leads and participates in the development of cost, schedule, and CM/DM status reporting requirements for IT projects.
6. Leads and participates in the development of Plans of Actions and Milestones (POA&Ms) required to address and solve identified schedule, budget, or CM/DM problems on IT projects.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors Degree in business, accounting, management, or other appropriate discipline and a minimum of 8 years of experience in implementing the above duties and responsibilities.

PROGRAM ANALYST

CLIN 0019

GENERAL SUMMARY

Participates in the Financial, Schedule, Cost, and/or Configuration/Data Management of major Information Technology (IT) projects.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the development and/or selection of the Project Management schedule and cost management techniques, procedures, and systems used on IT projects.
2. Participates in the development and/or selection of the Configuration Management (CM) and Data Management (DM) techniques, procedures, and systems used on IT projects.
3. Participates in the development of the formal budget and schedule for IT projects.
4. Participates in the monitoring and evaluation of project cost, schedule, and CM/DM status and problems on IT projects.
5. Participates in the development of cost, schedule, and CM/DM status reporting requirements for IT projects.
6. Participates in the development of Plans of Actions and Milestones (POA&Ms) required to address and solve identified schedule, budget, or CM/DM problems on IT projects.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Associates Degree in business, accounting, management, or other appropriate discipline and a minimum of 8 years of experience in implementing any of the above duties and responsibilities.

SENIOR PROGRAM PROTECTION ANALYST

CLIN 0020

GENERAL SUMMARY

Leads and participates in the development of acquisition protection policy and the development, preparation and review of OPSEC Plans, Security Plans, Facility Contingency/Disaster Recovery Plans, Security Training Plans, and Threat and Susceptibility Assessments.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the development of acquisition protection policy and required planning documentation for major Navy or other DoD ship and aircraft programs.
2. Leads and participates in the development of approved Acquisition System Protection Plans in accordance with DoD requirements.
3. Leads and participates in the development and preparation of U.S. government Security Instructions and Directives.
4. Leads and participates in the development, preparation, and review of U.S. government OPSEC Plans.
5. Leads and participates in the development, preparation, and review of U.S. government Security Plans.
6. Leads and participates in the development, preparation, and review of Facility Contingency/Disaster Recovery Plans for Government and Commercial customers.
7. Leads and participates in the development, preparation, and review of U.S. government Security Training Plans.
8. Leads and participates in the development, preparation, and review of U.S. government Threat and Susceptibility Assessments.
9. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited college or university and a minimum of eight (8) years experience in the areas of OPSEC and Automated Information System (AIS) security and at least five (5) years in support of the Navy or other DoD Acquisition Systems Protection Program. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the four (4) year degree requirement.

PROGRAM PROTECTION ANALYST

CLIN 0021

GENERAL SUMMARY

Participates in the development of acquisition protection policy and the development, preparation and review of OPSEC Plans, Security Plans, Facility Contingency/Disaster Recovery Plans, Security Training Plans, and Threat and Susceptibility Assessments.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the development of acquisition protection policy and required planning documentation for major Navy or other DoD ship and aircraft programs.
2. Participates in the development of approved Acquisition System Protection Plans in accordance with DoD requirements.
3. Participates in the development and preparation of U.S. government Security Instructions and Directives.
4. Participates in the development, preparation, and review of U.S. government OPSEC Plans.
5. Participates in the development, preparation, and review of U.S. government Security Plans.
6. Participates in the development, preparation, and review of Facility Contingency/Disaster Recovery Plans for Government and Commercial customers.
7. Participates in the development, preparation, and review of U.S. government Security Training Plans.
8. Participates in the development, preparation, and review of U.S. government Threat and Susceptibility Assessments.
9. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited college or university and a minimum of five (5) years experience in the areas of OPSEC, Automated Information System (AIS) security, and the Navy or other DoD Acquisition Systems Protection Program. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the four (4) year degree requirement.

JUNIOR PROGRAM PROTECTION ANALYST

CLIN 0022

GENERAL SUMMARY

Participates in the development of acquisition protection policy and the development, preparation and review of OPSEC Plans, Security Plans, Facility Contingency/Disaster Recovery Plans, Security Training Plans, and Threat and Susceptibility Assessments.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the development of acquisition protection policy and required planning documentation for major Navy or other DoD ship and aircraft programs.
2. Participates in the development of approved Acquisition System Protection Plans in accordance with DoD requirements.
3. Participates in the development and preparation of U.S. government Security Instructions and Directives.
4. Participates in the development, preparation, and review of U.S. government OPSEC Plans.
5. Participates in the development, preparation, and review of U.S. government Security Plans.
6. Participates in the development, preparation, and review of Facility Contingency/Disaster Recovery Plans for Government and Commercial customers.
7. Participates in the development, preparation, and review of U.S. government Security Training Plans.
8. Participates in the development, preparation, and review of U.S. government Threat and Susceptibility Assessments.
9. May perform other duties as assigned.

JOB SPECIFICATIONS

Associates degree from an accredited college or university and a minimum of two (2) years experience in the Navy or other DoD Acquisition Systems Protection Program. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the two (2) year degree requirement.

SENIOR LOGISTICS ANALYST

CLIN 0023

GENERAL SUMMARY

Leads and participates in the performance and evaluation of all of the logistics support requirements for U.S. Government and Foreign Military Sales programs.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the performance and evaluation of maintenance planning requirements for U.S. Government and Foreign Military Sales programs.
2. Leads and participates in the performance and evaluation of manpower and personnel requirements for U.S. Government and Foreign Military Sales programs.
3. Leads and participates in the performance and evaluation of supply support requirements for U.S. Government and Foreign Military Sales programs.
4. Leads and participates in the performance and evaluation of support equipment requirements for U.S. Government and Foreign Military Sales programs.
5. Leads and participates in the performance and evaluation of technical data requirements for U.S. Government and Foreign Military Sales programs.
6. Leads and participates in the performance and evaluation of training and training support requirements for U.S. Government and Foreign Military Sales programs.
7. Leads and participates in the performance and evaluation of computer resource requirements for U.S. Government and Foreign Military Sales programs.
8. Leads and participates in the performance and evaluation of facilities requirements for U.S. Government and Foreign Military Sales programs.
9. Leads and participates in the performance and evaluation of design interface requirements for U.S. Government and Foreign Military Sales programs.
10. Leads and participates in the performance and evaluation of packaging, handling, storage and transportation (PHS&T) requirements for U.S. Government and Foreign Military Sales programs.
11. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited university in a technical, science, management, or business discipline and a minimum of ten (10) years experience with U.S. government or Foreign Military Sales programs in all elements of Integrated Logistics Support. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the four (4) year degree requirement.

LOGISTICS ANALYST

CLIN 0024

GENERAL SUMMARY

Participates in the performance and evaluation of all of the logistics support requirements for U.S. Government and Foreign Military Sales programs.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the performance and evaluation of maintenance planning requirements for U.S. Government and Foreign Military Sales programs.
2. Participates in the performance and evaluation of manpower and personnel requirements for U.S. Government and Foreign Military Sales programs.
3. Participates in the performance and evaluation of supply support requirements for U.S. Government and Foreign Military Sales programs.
4. Participates in the performance and evaluation of support equipment requirements for U.S. Government and Foreign Military Sales programs.
5. Participates in the performance and evaluation of technical data requirements for U.S. Government and Foreign Military Sales programs.
6. Participates in the performance and evaluation of training and training support requirements for U.S. Government and Foreign Military Sales programs.
7. Participates in the performance and evaluation of computer resource requirements for U.S. Government and Foreign Military Sales programs.
8. Participates in the performance and evaluation of facilities requirements for U.S. Government and Foreign Military Sales programs.
9. Participates in the performance and evaluation of design interface requirements for U.S. Government and Foreign Military Sales programs.
10. Participates in the performance and evaluation of packaging, handling, storage and transportation (PHS&T) requirements for U.S. Government and Foreign Military Sales programs.
11. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited university in a technical, science, management, or business discipline and a minimum of six (6) years of logistics support experience with U.S. Government or Foreign Military Sales (FMS) programs. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the four (4) year degree requirement.

COMPUTER SPECIALIST

CLIN 0025

GENERAL SUMMARY

Participates in the support and evaluation of the design, development, and production requirements of advanced AIS and network systems and in the evaluation and implementation of new computer and network technologies for U.S. Government programs.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the support and evaluation of the design requirements of advanced AIS and network systems for U.S. Government programs.
2. Participates in the support and evaluation of the development requirements of advanced AIS and network systems for U.S. Government programs.
3. Participates in the support and evaluation of the production requirements of advanced AIS and network systems for U.S. Government programs.
4. Participates in the evaluation and implementation of new Integrated Circuit technologies such as VHSIC, ASIC, VLSI, MIMIC, and MMIC for U.S. Government programs.
5. Participates in the evaluation and implementation of new data processing hardware architectures such as Symmetric Parallel Processing for U.S. Government programs.
6. Participates in the evaluation and implementation of new LAN and WAN technologies for U.S. Government programs.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited college or university in computer science or an engineering discipline and a minimum of six (6) years experience in the design, development, and production of advanced AIS and network systems.

TRAINING SPECIALIST

CLIN 0026

GENERAL SUMMARY

Leads and participates in the use of sophisticated training technologies for personnel training and the design, development, and testing of training systems and courseware used in the performance of personnel training.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the use of Computer Aided Instructional Systems Development tools for the design, development, and testing of training systems.
2. Leads and participates in the design, development, and testing of Computer Based Training Systems for personnel training.
3. Leads and participates in the use of Knowledge Engineering techniques and technologies for the design, development, and testing of training systems.
4. Leads and participates in the design, development, and testing of Interactive Courseware (ICW) for personnel training.
5. May perform other duties as assigned.

JOB SPECIFICATIONS

Masters degree from an accredited college in psychology, or an educational discipline and a minimum of eight (8) years experience in instructional systems development and training system research and development for U.S. government programs. A bachelor's degree in the required disciplines plus an additional four (4) years of experience in the areas described above may be substituted for the specified degree.

EDUCATIONAL SPECIALIST

CLIN 0027

GENERAL SUMMARY

Leads and participates in the development and presentation of the curricula, materials, and media for personnel training courses including U.S. government security training courses.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the development of training curricula for personnel training courses.
2. Leads and participates in the development of training materials for personnel training courses.
3. Leads and participates in the development of training media for personnel training courses.
4. Leads and participates in the development of training curricula, materials, and media for U.S. government security training courses.
5. Leads and participates in the presentation of developed U.S. government security training courses.
6. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited university in psychology or an educational discipline and a minimum of six (6) years experience in the development of personnel training courses.

FINANCIAL SPECIALIST

CLIN 0028

GENERAL SUMMARY

Leads and participates in providing financial and budgeting support for major U.S. government programs, facilities, and organizations.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the development, implementation, and review of budgets for major U.S. Government programs.
2. Leads and participates in the tracking and evaluation of unit cost information for major U.S. Government programs.
3. Leads and participates in the maintenance and evaluation of historical cost data records for major U.S. Government programs.
4. Leads and participates in providing and reviewing out-year cost estimates and projections for major U.S. Government programs.
5. Leads and participates in the evaluation of the overall financial management of major U.S. Government programs and facilities
6. Leads and participates in the evaluation of program costs using cost estimation methodologies such as Cost Estimating Relationships (CER); specific analogies; specialist estimates; standard rates; cost model applications; and trend analysis.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree from an accredited university in accounting and a minimum of ten (10) years experience on U.S. government programs performing cost projection and analysis tasks.

SENIOR STAFF SCIENTIST

CLIN 0029

GENERAL SUMMARY

Leads and participates in a team of technical and scientific personnel in the definition, evaluation, and solution of scientific and technical problems in the areas of computer science, cryptography, communications, aerospace, physics, chemistry, mechanics, biology, or behavioral psychology.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Plans and performs research and analysis in computer science, cryptography, communications, aerospace, chemistry, mechanics, biology, or behavioral psychology.
2. Supervises team of technical and scientific personnel in the analysis of complex scientific problems and the identification of technical solutions.
3. Supports engineering staff in the development, design, and evaluation of practical solutions to identified problems.
4. Coordinates activities and results of scientific team with program manager and senior executives.
5. May perform other duties as assigned.

JOB SPECIFICATIONS

Doctorate Degree in related field or equivalent and at least 8 years of related experience or; a Masters Degree and at least 12 years of related experience.

SENIOR EXECUTIVE

CLIN 0030

GENERAL SUMMARY

Senior level corporate manager responsible for the staffing, direction, monitoring, and review of several major projects in the areas of systems engineering, acquisition management, technical analysis, test and evaluation, and production.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Assists Program Managers with the management of assigned programs during periods of high workload or performance difficulties.
2. Reports to Corporate CEO on the progress and performance of corporate contracts.
3. Responsible for identifying solutions to difficult technical and program management problems in the areas of performance, cost management, and schedule control.
4. Provides assistance to Program Managers in identifying additional corporate resources that could be utilized to address contract short term or long term requirements.
5. Substitutes for Program Manager on a short or long term basis during emergency or unanticipated circumstances.
6. May perform other duties as assigned.

JOB SPECIFICATIONS

Masters Degree in an engineering, scientific, technical, business, education or other appropriate discipline and a minimum of 20 years experience in engineering, technical, or business management. At least 5 of the 20 years experience must be as a senior level manager in government (SES level), military (flag level), or industry (CEO/COO/President level).

PROGRAM MANAGER

CLIN 0031

GENERAL SUMMARY

Supervises and coordinates work in the security disciplines of Operations Security (OPSEC), Signal Security (SIGSEC), Communications Security (COMSEC), and Automated Information System (AIS) security.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Manages and participates in programs and tasks for the performance of security risk assessments, system threat assessments, vulnerability assessments, and penetration analyses of facilities, Automated Information Systems and networks.
2. Manages and participates in programs and tasks in support of the development and preparation of OPSEC Plans, Security Plans, Tempest Plans, and Vulnerability Assessments.
3. Manages and participates in programs and tasks for the evaluation of AIS and Network access control, data integrity, and system virus and worm countermeasures associated with data processing, LAN, and WAN systems.
4. Manages and participates in programs and tasks in support of the development of acquisition protection policy and required planning documentation for major Navy or other DoD ship and aircraft programs.
5. Manages and participates in programs and tasks in support of the development of approved Acquisition System Protection Plans in accordance with DoD requirements.
6. Manages and participates in programs and tasks in support of the development and preparation of U.S. government Security Instructions and Directives.
7. Manages and participates in programs and tasks in support of the development, preparation, and review of U.S. government OPSEC Plans.
8. Manages and participates in programs and tasks in support of the development, preparation, and review of U.S. government Security Plans.
9. Manages and participates in programs and tasks in support of the development, preparation, and review of Facility Contingency/Disaster Recovery Plans for Government and Commercial customers.
10. Manages and participates in programs and tasks in support of the development, preparation, and review of U.S. government Security Training Plans.
11. Manages and participates in programs and tasks in support of the development, preparation, and review of U.S. government Threat and Susceptibility Assessments.
12. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelors degree from an accredited college or university in Business or Management and a minimum of ten (10) years recent experience in the disciplines of Operations Security (OPSEC), Signal Security (SIGSEC), Communications Security (COMSEC), and Automated Information System (AIS) security.

SENIOR ELECTRONICS TECHNICIAN

CLIN 0032

GENERAL SUMMARY

Leads and participates in the troubleshooting, maintenance, and technical support of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Leads and participates in the troubleshooting and repair of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
2. Leads and participates in the maintenance and technical support of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
3. Leads and participates in the installation, modification, and upgrade of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
4. Leads and participates in the performance of routine maintenance of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
5. Leads and participates in the performance of maintenance training for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
6. Leads and participates in the performance of maintenance and support analyses for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
7. Leads and participates in the development of maintenance and support requirements for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

High school graduate and minimum of 10 years of experience in implementing the above duties and responsibilities.

ELECTRONICS TECHNICIAN

CLIN 0033

GENERAL SUMMARY

Participates in the troubleshooting, maintenance, and technical support of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the troubleshooting and repair of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
2. Participates in the maintenance and technical support of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
3. Participates in the installation, modification, and upgrade of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
4. Participates in the performance of routine maintenance of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
5. Participates in the performance of maintenance training for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
6. Participates in the performance of maintenance and support analyses for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
7. Participates in the development of maintenance and support requirements for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

High school graduate and a minimum of 6 years of experience in implementing the above duties and responsibilities.

JUNIOR ELECTRONICS TECHNICIAN

CLIN 0034

GENERAL SUMMARY

Participates in the troubleshooting, maintenance, and technical support of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Participates in the troubleshooting and repair of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
2. Participates in the maintenance and technical support of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
3. Participates in the installation, modification, and upgrade of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
4. Participates in the performance of routine maintenance of data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
5. Participates in the performance of maintenance training for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
6. Participates in the performance of maintenance and support analyses for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
7. Participates in the development of maintenance and support requirements for data processing, Local Area Network (LAN), Wide Area Network (WAN), and electronics/avionics hardware, equipment, and systems.
8. May perform other duties as assigned.

JOB SPECIFICATIONS

High school graduate and a minimum of 2 years of experience in implementing the above duties and responsibilities.

TECHNICAL EDITOR

CLIN 0035

GENERAL SUMMARY

Develops finished engineering, logistics, program management, or training documentation from raw data provided by technical staff, source materials, and technical references.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Interprets raw engineering, logistics, program management, or training data and converts it into an easily read and understood technical manuscript.
2. Utilizes specified standards and contract requirements to develop deliverable documentation and manuals.
3. Converts engineering, logistics, program management, or training data into a user oriented narrative that can be understood and utilized by a designated target user population.
4. Reviews draft engineering, logistics, program management, or training documentation and corrects problems in syntax, format, and content in accordance with contract and utilization requirements.
5. Edits draft engineering, logistics, program management, or training documentation to develop a finished product that is correct and in accordance with contract and user requirements.
6. Utilizes sophisticated word processing and desktop publishing programs to perform the above tasks.
7. May perform other duties as assigned.

JOB SPECIFICATIONS

Bachelor's degree and a minimum of three (3) years experience in the editing of engineering, logistics, program management, or training documentation. Once the minimum experience requirements are met as defined above, two (2) years of additional experience may be substituted for each year of the four (4) year degree requirement.

ADMINISTRATIVE ASSISTANT

CLIN 0036

GENERAL SUMMARY

Provides support to senior management in the performance of administrative functions in support of a project or program(s).

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Implements and tracks the ordering of materials, equipment, and supplies in support of assigned projects and programs.
2. Maintains and tracks security records for assigned projects.
3. Supervises typists and maintains workload schedules.
4. Performs Quality Assurance on all documents produced for clients and corporate management by senior managers.
5. Implements document filing and security system within the assigned program.
6. May perform other duties as assigned

JOB SPECIFICATIONS

High School Diploma and 5 years of experience in providing administrative support to senior management for a major project or program(s).

TECHNICAL TYPIST

CLIN 0037

GENERAL SUMMARY

Prepares technical documentation and publications using various word processing systems and software.

PRINCIPAL DUTIES AND RESPONSIBILITIES

1. Prepares, modifies, and reviews finished technical documentation in accordance with contract requirements.
2. Interprets technical and scientific terminology for correct utilization in deliverable documentation.
3. Capable of utilizing several word processor and desk-top publishing systems and software in the preparation of documentation.
4. May perform other duties as assigned.

JOB SPECIFICATIONS

Trade or secretarial school training with 6 years experience in the preparation of technical documentation and publications using various word processing systems and software

DESCRIPTION SENTINEL CLINS

Sentinel Communications Security Equipment and Components

The Sentinel III, EAL 4-validated, Cyber Security System enables users to securely access, store and process unclassified or classified or restricted data and can be installed in any desktop computer to prevent a user's data from being transferred to an unauthorized user by providing validated Identification and Authentication (I&A) of the user to the terminal when the console is utilized in a multi-user environment by.

The Sentinel controls access to computer consoles via a Smart-Card-based security token that stores a user's access rights to data and their permitted interfaces with peripherals and networks. The Sentinel is a Kit that can be installed in most computer consoles/workstations. The Sentinel Kit includes a Security Module; an LCD Module for displaying Security Module initialization data entered from the keyboard; and all computer interface cables and circuitry. The Security Module includes an embedded Smart Card Reader and circuitry that reads the user's Smart Card to identify and authenticate users, control access to data and computer interfaces, and record user actions in an audit file.

All data is stored on the computer's internal hard drive which is keyed to the users Smart Card and ID so that only an authenticated user with the required access rights can access the data on the computer. Access to portable media such as Floppy Disks, write-capable CD/DVDs, and Non-Volatile Memories in BIOS, Video, and Smart Cards is disabled during operation in the restricted domain to prevent unauthorized access to restricted data. The Sentinel III is listed on NIAP's Web Site (<http://niap.nist.gov/cc-scheme/ValidatedProducts.html>) as a Validated Product at EAL 4 in 29 functions under the categories of System Access Control and Sensitive Data Protection.

A Security Administrator Kit that includes the required software to initially setup and support user Smart Cards is provided at no additional cost.

Sentinel CLIN 001 – Sentinel Kit for Token-Based Security in a Single PC (One Domain Kit with 1 HDD)

The Sentinel III, EAL 4-validated, Cyber Security System prevents a user's data from being transferred to an unauthorized user when the console is utilized in a multi-user environment, and provides validated Identification and Authentication (I&A) of the user to the terminal. The Sentinel provides sufficient security protection to allow users to process classified or sensitive level data at the desktop within facilities with restricted access if the organization's security policy permits.

Sentinel CLIN 002 - Dual-Domain Kit

The Sentinel III, EAL 4-validated, Cyber Security System can be installed in any desktop computer to securely access, store and process unclassified and classified data in the same computer console. The Sentinel prevents a user's data from being transferred to an unauthorized user when the console is utilized in a multi-user environment, and provides validated Identification and Authentication (I&A) of the user to the terminal. It also provides EAL4-validated domain separation that provides secure multi-domain data access, storage and processing capability thereby providing the means to safely access, store and process a restricted domain and an unrestricted domain in one computer console. This capability eliminates the user's need for two separate computers for each security domain. In addition, the Sentinel provides sufficient security protection to allow users to process classified or sensitive level data at the desktop within facilities with restricted access if the organization's security policy permits. Access to portable media such as Floppy Disks, write capable CD/DVDs, and Non-Volatile Memories in BIOS, Video, and Smart Cards is disabled during operation in the restricted domain to prevent unauthorized access to restricted data.

The Sentinel Dual-Domain Kit controls access to computer consoles via a Smart-Card-based security token that stores a user's access rights to data and their permitted interfaces with peripherals and networks. This Kit includes a Security Module that can be installed in the computer console; a Smart Card for each user; an LCD Module for

displaying Security Module initialization data entered from the keyboard; all computer interface cables and circuitry. The Security Module includes an embedded Smart Card Reader and circuitry that reads the user's Smart Card to identify and authenticate users, control access to data and computer interfaces, and record user actions in an audit file. The Sentinel Kit can be installed to control access to both internal hard disk drives (IHDD) and removable hard disk drives (RHDD). Multi-domain applications in which a restricted domain is at a sensitive level can be implemented with IHDDs for each sensitive domain. If Sentinel is being installed to control access to RHDDs, then the option of adding RHDD ID cards should be considered.

A Security Administrator Kit that includes the required software to initially setup and support user Smart Cards is provided at no additional cost.

Dual-domain Kit with RHDD Card Options:

If restricted data on the RHDD is at a classified level, the RHDD ID Card option should be selected for each classified domain. This allows the classified data for each user to be removed from the console and stored when the computer is not being used. The RHDD ID Card allows the RHDD to be keyed to the user's Smart Card and ID so that only an authenticated user with the required access rights can access the data on the RHDD.

Sentinel CLIN 003 -Three-Domain Kit

The Sentinel III, EAL 4-validated, Cyber Security System can be installed in any desktop computer to securely access, store and process unclassified and classified data in the same computer console. This upgrade prevents a user's data from being transferred to an unauthorized user when the console is utilized in a multi-user environment, and provides validated Identification and Authentication (I&A) of the user to the terminal. It also provides EAL4-validated domain separation that provides secure multi-domain data access, storage and processing capability thereby providing the means to safely access, store and process a restricted domain and an unrestricted domain in one computer console. This capability eliminates the user's need for three separate computers for each security domain. In addition, this Sentinel Kit provides sufficient security protection to allow users to process classified or sensitive level data at the desktop within facilities with restricted access if the organization's security policy permits. Access to portable media such as Floppy Disks, write capable CD/DVDs, and Non-Volatile Memories in BIOS, Video, and Smart Cards is disabled during operation in the restricted domain to prevent unauthorized access to restricted data.

The Sentinel Three-Domain Kit controls access to the computer console via a Smart-Card-based security token that stores a user's access rights to data and their permitted interfaces with peripherals and networks. The Kit includes a Security Module that can be installed in the computer console; a Smart Card for each user; an LCD Module for displaying Security Module initialization data entered from the keyboard; all computer interface cables and circuitry. The Security Module includes an embedded Smart Card Reader and circuitry that reads the user Smart Card to identify and authenticate users, control access to data and computer interfaces, and record user actions in an audit file. The Sentinel Kit can be installed to control access to both internal hard disk drives (IHDD) and removable hard disk drives (RHDD). Multi-domain applications in which a restricted domain is at a sensitive level can be implemented with IHDDs for each sensitive domain. If Sentinel is being installed to control access to RHDDs, then the option of adding RHDD ID cards should be considered.

A Security Administrator Kit that includes the required software to initially setup and support user Smart Cards is provided at no additional cost.

Three-domain Kit with RHDD ID Card Options:

If restricted data on the RHDD is at a classified level, the RHDD ID Card option should be selected for each classified domain. This allows the classified data for each user to be removed from the console and stored when the computer is not being used. The RHDD ID Card allows the RHDD to be keyed to the user's Smart Card and ID so that only an authenticated user with the required access rights can access the data on the RHDD.

SENTINEL CLINS ~ COST TABLE

Sentinel Kit for Token-Based Security in a Single PC

SENTINEL CLIN 1

Price: \$438 to \$608 depending on Quantity purchased

The Sentinel III, EAL 4-validated, Cyber Security System enables users to securely access, store and process unclassified or classified data. The Sentinel can be installed in any desktop computer to prevent a user's data from being transferred to an unauthorized user by providing validated Identification and Authentication (I&A) of the user to the terminal when the console is utilized in a multi-user environment

The Sentinel controls access to computer consoles via a Smart-Card-based security token that stores a user's access rights to data and their permitted interfaces with peripherals and networks. The Sentinel Kit includes a Security Module that can be installed in any computer console; an LCD Module for displaying Security Module initialization data entered from the keyboard; and all computer interface cables and circuitry. The Security Module includes an embedded Smart Card Reader and circuitry that reads the user's Smart Card to identify and authenticate users, control access to data and computer interfaces, and record user actions in an audit file.

All data is stored on the computer's internal hard drive which is keyed to the users Smart Card and ID so that only an authenticated user with the required access rights can access the data on the computer. Access to portable media such as Floppy Disks, write capable CD/DVDs, and Non-Volatile Memories in BIOS, Video, and Smart Cards is disabled during operation in the restricted domain to prevent unauthorized access to restricted data.

A Security Administrator Kit that includes the required software to initially setup and support user Smart Cards is provided at no additional cost

SENTINEL CLIN 1	Quantity	<= 100 Units	<= 500 Units	<= 1,000 Units	<= 10,000 Units
One-domain Kit with 1 IHDD:					
Sentinel Security Module	1	\$599.00	\$572.00	\$473.00	\$428.80
Smart Card	1	\$9.00	\$9.00	\$9.00	\$9.00
Total		\$608.00	\$581.00	\$494.00	454.00

Dual-Domain Sentinel Kit

SENTINEL CLIN 2

Price: \$556 - \$751 depending on Configuration and Quantities purchased

The Sentinel III, EAL 4-validated, Cyber Security System can be installed in any desktop computer to securely access, store and process unclassified and classified data in the same computer console. The Sentinel prevents a user's data from being transferred to an unauthorized user when the console is utilized in a multi-user environment, and provides validated Identification and Authentication (I&A) of the user to the terminal. It also provides EAL4-validated domain separation that provides secure multi-domain data access, storage and processing capability thereby providing the means to safely access, store and process a restricted domain and an unrestricted domain in one computer console. This capability eliminates the user's need for two separate computers for each security domain. In addition, the Sentinel provides sufficient security protection to allow users to process classified or sensitive level data at the desktop within facilities with restricted access dependent upon the organization's security policy. Access to portable media such as Floppy Disks, write capable CD/DVDs, and Non-Volatile Memories in BIOS, Video, and Smart Cards is disabled during operation in the restricted domain to prevent unauthorized access to restricted data.

The Sentinel Dual-Domain Kit controls access to computer consoles via a Smart-Card-based security token that stores a user's access rights to data and their permitted interfaces with peripherals and networks. This Kit includes a Security Module that can be installed in the computer console; a Smart Card for each user; an LCD Module for displaying Security Module initialization data entered from the keyboard; all computer interface cables and circuitry. The Security Module includes an embedded Smart Card Reader and circuitry that reads the user Smart Card to identify and authenticate users, control access to data and computer interfaces, and record user actions in an audit file. The Sentinel Kit can be installed to control access to both internal hard disk drives (IHDD) and removable hard disk drives (RHDD). Multi-domain applications in which a restricted domain is at a sensitive level can be implemented with IHDDs for each sensitive domain. If Sentinel is being installed to control access to RHDDs, then the option of adding RHDD ID cards should be considered.

If restricted data on the RHDD is at a classified level, the RHDD ID Card option should be selected for each classified domain. This allows the classified data for each user to be removed from the console and stored when the computer is not being used. The RHDD ID Card allows the RHDD to be keyed to the user's Smart Card and ID so that only an authenticated user with the required access rights can access the data on the RHDD.

A Security Administrator Kit that includes the required software to initially setup and support user Smart Cards is provided at no additional cost.

SENTINEL CLIN 2	Quantity	<= 100 Units	<= 500 Units	<= 1,000 Units	<= 10,000 Units

Three-Domain Sentinel Kit

The Sentinel III, EAL 4-validated, Cyber Security System can be installed in any desktop computer to securely access, store and process unclassified and classified data in the same computer console. This upgrade prevents a user's data from being transferred to an unauthorized user when the console is utilized in a multi-user environment, and provides validated Identification and Authentication (I&A) of the user to the terminal. It also provides EAL4-validated domain separation that provides secure multi-domain data access, storage and processing capability thereby providing the means to safely access, store and process a restricted domain and an unrestricted domain in one computer console. This capability eliminates the user's need for three separate computers for each security domain. In addition, this Sentinel Kit provides sufficient security protection to allow users to process classified or sensitive level data at the desktop within facilities with restricted access dependent upon the organization's security policy. Access to portable media such as Floppy Disks, write capable CD/DVDs, and Non-Volatile Memories in BIOS, Video, and Smart Cards is disabled during operation in the restricted domain to prevent unauthorized access to restricted data.

The Sentinel Three-Domain Kit controls access to the computer console via a Smart-Card-based security token that stores a user's access rights to data and their permitted interfaces with peripherals and networks. The Kit includes a Security Module that can be installed in the computer console; a Smart Card for each user; an LCD Module for displaying Security Module initialization data entered from the keyboard; all computer interface cables and circuitry. The Security Module includes an embedded Smart Card Reader and circuitry that reads the user Smart Card to identify and authenticate users, control access to data and computer interfaces, and record user actions in an audit file. The Sentinel Kit can be installed to control access to both internal hard disk drives (IHDD) and removable hard disk drives (RHDD). Multi-domain applications in which a restricted domain is at a sensitive level can be implemented with IHDDs for each sensitive domain. If Sentinel is being installed to control access to RHDDs, then the option of adding RHDD ID cards should be considered.

If restricted data on the RHDD is at a classified level, the RHDD ID Card option should be selected for each classified domain. This allows the classified data for each user to be removed from the console and stored when the computer is not being used. The RHDD ID Card allows the RHDD to be keyed to the user's Smart Card and ID so that only an authenticated user with the required access rights can access the data on the RHDD.

A Security Administrator Kit that includes the required software to initially setup and support user Smart Cards is provided at no additional cost.
